COLLEGE OF BUSINESS ADMINISTRATION

Bachelor of Science in Accounting and Finance

Building Ethical, Analytical, and Future-Ready Financial Professionals

Program Objectives

1. Enhance students' knowledge and understanding of modern accounting and finance practices, theories, and their practical applications.
2. Equip students with essential analytical skills needed for careers in accounting and finance
3. Develop students' capacity to think and work both independently and collaboratively to address real-world challenges in accounting and finance.
4. Foster students' ability to incorporate ethical principles and sustainable practices into accounting and financial decision-making.
5. Empower students to pursue and attain prestigious professional certifications (e.g., CMA).

Program Learning Outcomes

Upon completion of the program, graduates will be able to:

1. Apply key theories and concepts from accounting, finance and related business disciplines to different types of organizations.
2. Communicate professional analyses of financial information and solutions to diverse audiences.
3. Analyze complex financial and non-financial data using analytical and technological tools to support evidence-based decisions.
4. Assess the ethical, legal and sustainability implications of accounting and financial decisions.
5. Evaluate contemporary accounting and financial issues using appropriate research methodologies and analytical tools.
6. Formulate accounting reports and financial strategies and solutions that respond to stakeholder and organizational goals.

Graduates will be prepared for roles such as:

- Accounting and Assurance: Auditor, Management Accountant, Chartered Accountant, Corporate Controller
- Finance and Investment: Financial Analyst, Investment Analyst, Budget Analyst, Credit Manager
- Risk and Compliance: Tax Consultant, Compliance Officer, Risk and Credit Analyst
- Advisory and Development: Financial Consultant, postgraduate study, and professional certification pathways

Unique Program Features

- Sustainability embedded through ESG, sustainable finance, and responsible accounting practices.
- Data analytics, financial technology, and digital tools integrated across the curriculum.
- Applied learning through cases, simulations, internships, and industry-based projects.

Why Choose This Program?

- Professional relevance: Curriculum supports certification pathways and strong career readiness.
- Digital capability: Students learn to analyze, interpret, and visualize financial data.
- Responsible practice: Ethics, governance, and sustainability inform financial decisions.
- Career flexibility: Graduates can pursue accounting, auditing, finance, risk, compliance, and consultancy roles.
